

DTA-45 Installation Guide

Please take a moment, read and analyze this manual before you install the Amplifier in your carputer enclosure. Often times, rushing into installing the unit can result in serious damage. Always check the polarity of your wires with a voltmeter.

Avoid using the cigarette plug as a power source, often times the contacts are not capable of delivering a stable high current to your PC.

FEATURES

- 12V DC @ 3.5 AMP Single supply operation
- 110mm (L) x 63mm (W) x 30mm (H)
- Can be connected directly to the mother board's audio headers
- "Audiophile" Quality Sound
- High Power Class T architecture
- High Efficiency
- Dynamic Range = 102 dB
- Turn-on & turn-off pop suppression
- Over-current protection
- Over-temperature protection
- Strong enough to power 4x45 watt or 2x75watt speakers
- Dynamic Range = 103 dB
- Up to 2X25Wrms @ 4Ohm, VDD=14.6V
- Mute inputs

The DTA45 has been designed to work along with many electronic devices such as radios, dvd/cd players, etc.
